Project Execution Experience

Technical Writing Intern

June – August 2021

Amazon Web Service (AWS) - QuickSight Documentation Team

Seattle, WA

- Created an immersive walkthrough for QuickSight Q in XML, to be released for public documentation <https://docs.aws.amazon.com/quicksight/latest/user/welcome.html>.
- Showcased key functions by collaborating with the service team and abstracting machine learning concepts.
- Created a Q Topic in QuickSight, a tool using natural language processing, deep learning, and voice design.
- Developed a sample relational database model and generated sample data (75k rows) with trends and traffic to simulate business intelligence analytics.

Design and Development Volunteer

April - June 2021

re:Bloom - Royally Fit Team

Pittsburgh, PA

- Led the redesign and redevelopment of a website for a small business using Shopify, Bootstrap, and Figma.
- Conducted user testing and interviews to improve the business' online presence with data-driven decisions.
- Collaborated with the client to create a brand kit and develop a marketing strategy with SEO.

Project Lead - Course Project

March - April 2021

Carnegie Mellon University - Assistant in Gmail

Pittsburgh, PA

- Collaborated in a team of 5 to design an adaptive user interface (AUI) opportunity in Gmail to reduce time spent searching for meeting-relevant emails by approximately 20% and increase potential data collection.
- Implemented design patterns to repair inference errors and ensure consistency with the Google Suite.
- Facilitated team through multiple pivots to ensure that it would be necessary and marketable to customers, as well as feasible to implement.

Research Experience

Contributor

May 2020 - Present

Carnegie Mellon University - Oppenheimer Lab

Pittsburgh, PA

- Collaborated on a cognitive psychology project to determine psychological barriers to PPE usage by implementing a driving simulator experiment and work safety experiment.
- Researched, acquired, and programmed a driving simulator for experimental environments to test subjects.
- Maintained technological needs for the lab through communicating with the vendor and updating software.
